**WRITTEN OPINION OF THE  
INTERNATIONAL SEARCHING AUTHORITY**

International application No.  
PCT/IB07/51947

**Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

**1: Statement**

Novelty (N)	Claims <u>NONE</u> _____	YES
	Claims <u>1-8</u> _____	NO
Inventive step (IS)	Claims <u>NONE</u> _____	YES
	Claims <u>1-8</u> _____	NO
Industrial applicability (IA)	Claims <u>1-8</u> _____	YES
	Claims <u>NONE</u> _____	NO

**2. Citations and explanations:**

Claims 1-8 lack novelty under PCT Article 33(2) as being anticipated by U.S. Patent App. Pub. 2005/0256748 to Gore et al.

As per claims 1-8, Gore et al. teaches a method of managing a life insurance policy where the life insurer receives a premium from an insured life and wherein if the insured life suffers an insured event, the life insurer pays a predetermined sum assured to the insured life or a beneficiary nominated by the insured life (see: paragraph 13). Gore et al. further teaches that Typical life insurance policies operate in that an insured life pays a premium to the life insurer and a payout is made to the insured life or their beneficiaries upon the insured life suffering a disability, contracting a dread disease or dying (see: paragraph 2). The payout on these contingencies is collectively termed as risk benefits (see: paragraph 2). Moreover, Gore et al. teaches an exemplary computer system 10 including a processor 12 (e.g., a central processing unit (CPU) a graphics processing unit (GPU) or both) and a memory 14 (see: paragraphs 79-80).

Claims 1-8 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
